

Kris Wen

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python, SQL

Frontend & Frameworks: Node.js, Express.js, Webpack, Jest, React.js, Bootstrap

AdTech & Analytics: gtag.js, GA4, GTM, Ads Data Hub, dataLayer, Marketo, image pixels

Tools & Infrastructure: Git, GitHub Actions, Jenkins, CI/CD, Postman, MongoDB, MS-SQL, WordPress, Magento

AI Tech: MCP, LLMs (Gemini, Codex, ChatGPT), Agentic Workflows, Prompt Engineering

PROFESSIONAL EXPERIENCE

American Express | Software Engineer - AdTech | 05/2024 – Present

- Governed enterprise marketing signal capture ensuring 100% GDPR/CCPA compliance with +/- 2% impression parity globally by engineering a custom JavaScript-based gtag.js wrapper to replace legacy 3rd-party pixels.
- Prevented silent measurement loss and optimized DOM performance resulting in zero cross-site scripting (XSS) vulnerabilities by strictly managing CSP directives (script-src, connect-src) for script execution.
- Streamlined global tag deployments by automating testing and code validation pipelines using Jenkins, GitHub workflows, and custom encoded/decoded tag logic.
- Accelerated internal JSON tag validation by reducing manual code review time by 40% through the development of a custom AI Agent skill using GitHub Copilot.

Mancini's Sleepworld | Technical Consultant / Website Manager | 08/2021 – 05/2024

- Boosted promotional event conversion rates by 25% and user engagement by 30% by designing and developing highly responsive, mobile-first landing pages using JavaScript, HTML, and CSS.
- Accelerated project delivery timelines while maintaining a 0% critical bug rate in production by managing code reviews, QA pipelines, and delegating feature architecture to a team of 4 outsourced developers.
- Improved operational marketing efficiency by 25% and customer interaction rates by 15% by architecting automated data journeys within the Salesforce Marketing Cloud.

Resolve Biosciences | Web Developer | 10/2022 – 05/2023

- Accelerated corporate website load times by 25% and reduced bounce rates by 20% within two months by spearheading the technical implementation and maintenance of the WordPress platform.
- Increased convention user interaction by 40% by engineering a highly responsive, offline-capable interactive eBook microsite utilizing React.js components.
- Boosted marketing campaign effectiveness by 20% by developing responsive, customized Marketo templates that directly increased email click-through rates.
- Captured a 30% increase in organic traffic and secured page-1 Google rankings within 60 days by optimizing on-page and technical SEO infrastructure.
- Achieved 99.8% server uptime and 99.9% data security by leading a comprehensive web hosting migration and implementing automated backup architecture.

SIIG, Inc. | E-commerce Platform Administrator | 08/2018 – 08/2021

- Minimized inventory discrepancies to near-zero by decreasing daily data processing time by 40% through the optimization of automated ETL processes using Node.js and SQL.
- Captured a 10% increase in market share by resolving complex data mapping bottlenecks through the seamless integration of the Amazon SP API with internal order routing systems.
- Reclaimed 15 hours of manual data entry per week and improved catalog accuracy to 99% by writing Python and SQL scripts to clean and migrate product data feeds.

AI & ENGINEERING PROJECTS

- **Seats-Aero MCP Server (AI Agent Integration):** Built a custom Model Context Protocol (MCP) server enabling LLMs to dynamically query and interact with external flight API data, bridging the context gap between AI assistants and live JSON schemas.
- **Agent-Assisted Development:** Leveraged OpenAI Codex, Gemini, and GitHub Copilot to architect microservices, automate unit testing, and perform rigorous PR reviews, drastically reducing standard development life cycles.

EDUCATION

- **Master of Science, Computer Science** | California State University, East Bay
- **Bachelor of Science, Computer Science** | California State University, East Bay
